

The University of Minnesota
Water Resources Science Distinguished Lecture Series presents:

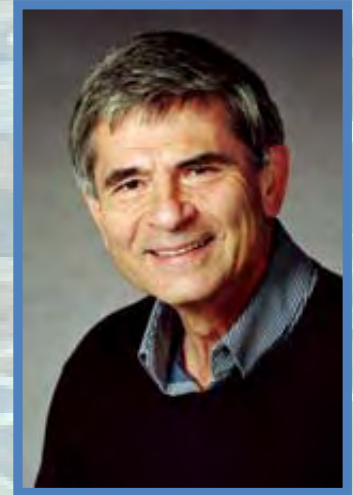

LIFE IN A CHANGING CLIMATE

by

Jörg Imberger

Director of the Centre for Water Research

University of Western Australia

TUESDAY, OCTOBER 14
4:00 pm - 110 GREEN HALL
ST. PAUL CAMPUS

Sponsored by the Graduate Program in Water Resources Science with funding from the Graduate School, Water Resources Center, Institute on the Environment, St Anthony Falls Laboratory, National Center for Earth-surface Dynamics & Non-equilibrium Dynamics IGERT

Jörg Imberger's main research interests are the motion and mixing in lakes, estuaries and coastal seas, ecosystem modeling, and the sustainable management of aquatic systems.

Professor Imberger is a fellow of the Royal Academy of Engineering (UK), a member of the US National Academy of Engineering and a fellow of the American Geophysical Union.
